DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This 2 story flat roofed building is located at the corner of Mulberry Street. Featuring a curtain wall of glass and steel it is in a watered down version of the International style.

The Howard Street facade consists of 2 bays each divided into 3 vertical strips by metal mullions. The first floor windows are each a single pane of glass. The second floor windows are identical but not as tall and have opaque black glass panels under and above them. There is a vertical panel of polished black granite to the extreme right which continues under the first floor windows as a low base. The two first floor panes near the corner (on the left) are divided horizontally into 2 panels. The one to the far left includes a pair of glass and steel doors, the one to its right a metal rail. Both have a small overhang at the level of the top of the doors. There is a digital clock/thermometer over the doors. A vertical sign extends up from the top edge of the doors, curving around the corner column up to the roof whose edge is ornamented by a wrought iron railing with a circle motif.

The Mulberry Street side of the building has similar fenestration, this time of 4 bays each with 3 panels. There is another clock/thermometer at the corner, but the panes are not interrupted by doors. The black granite base again appears. The same stone also surfaces a portion of wall to the far left which includes a vertical strip 3 panes of glass with a glass and steel door at the bottom. The iron decorative rail ornaments this facade too.
